

# WELCOME TO A NEW WAY TO PAY

Add your MHPFCU Debit or Credit Card to  
Apple Pay™ for a whole new way to pay!

## Apple Pay™ is Here

Now you can use your MHPFCU Credit and Debit Card with Apple Pay™ on your iPhone 6®, iPhone 6 Plus®, iPhone 6S®, iPhone 6S Plus®, Apple Watch™, iPad Pro®, iPad Air 2®, iPad mini 4® or iPad mini 3® and experience a whole new way to pay.

## A new way to pay

Adding your MHPFCU MasterCard™ to Apple Pay™ provides innovative security features and convenience. Simply use your TouchID™ thumbprint or passcode to authorize a purchase. There is no need to swipe your card and use your card number.

## How it works

When you use Apple Pay™, your actual card number is never shared with the merchant and is not stored on the device. Instead, Apple Pay™ creates a Device Account Number to process your payment. When you make a purchase, the Device Account Number is used to process your payment.

## Getting started

1. Make sure your iPhone, iPad or Apple Watch is compatible with Apple Pay and has the latest version of iOS.
2. Add your MHPFCU Credit or Debit Card to Apple Pay™.
3. Pay with a single touch at thousands of stores and in participating apps.
